

ALLERGIC REACTION

Students with life-threatening allergies should be known to all staff. An emergency plan should be developed for these students.

Children may experience a delayed allergic reaction up to 2 hours following food ingestion, bee sting, etc.

Symptoms of **severe** allergic reaction include:

- Hives all over body
- Flushed face
- Weakness
- Paleness
- Seizures
- Confusion
- Dizziness
- Blueness around eyes, mouth
- Loss of Consciousness
- Drooling or difficulty breathing.

Symptoms of **mild** allergic reaction include:

- Red itchy eyes.
- Itchy, sneezing, runny nose.
- Several hives, or rash on one part of the body.

Refer to student's emergency plan. Administer guardian-approved medication or use student's epinephrine pen, if available.

Does individual have symptoms of severe allergic reaction?

← NO

YES

Adult(s) supervising student during normal activities should be aware of the student's exposure and watch for any delayed reaction for up to **2 hours**.

CALL EMERGENCY MEDICAL SERVICE.  Contact responsible school authority & parent/legal guardian.

If child is unable to participate in school activities, contact appropriate school authority & parent/legal guardian.

If child stops breathing, give rescue breaths.
